## 1 INTRODUCTION

Humm Group Limited (“Humm”) has commissioned DNV GL Business Assurance Australia (“DNV GL”) to carry out the verification of the humm ABS Trust 2021-2 Class A1-G, Class B-G, Class C-G, Class D-G and Class E-G green ABS Notes, specifically this report relates to the Class A1-G, B-G, C-G, D-G and E-G Notes (“the Bond”). This report contains the findings from the verification and a verification statement regarding compliance with the Climate Bond Standard version 3.0 (“Climate Bond Standard”).

### 1.1 Objective

A verification audit takes place as part of the process of a Green Bond issuer applying for a Climate Bonds Certification Mark for issuance of Certified Green Bonds. The purpose of verification is to have an independent third party assess whether or not an issuer of Certified Green Bonds is complying with the Standard through a compliance audit of the procedures which are either already in place or are being established to manage the proceeds of the Bond effectively and in line with the objectives of the Climate Bond Standard.

### 1.2 Scope

The verification scope is defined as an independent and objective reasonable assurance audit of the Bond and the Bond issuer. The Bond and the Bond issuer are reviewed against the criteria stated in the Climate Bond Standard.

The verification is not meant to provide any consulting towards the Bond issuer. However, stated requests for clarifications and/or corrective actions may have provided input for improvement of the capacity of the Bond issuer to comply with the Climate Bond Standard.

## 2 METHODOLOGY

The verification consisted of the following two phases:

- I desktop reviews of Humm’s and associated parties’ documentation leading up to issuance and execution of the Pre and Post Issuance Verification
- II desktop review of the Pre and Post issuance Humm and associated parties’ documentation and execution of the Post Issuance Verification

The following sections outline each step in more detail.

## 2.1 Review of Documentation

Documents provided by Humm that relate directly to the Green Bond are listed below. These have been used as direct sources of evidence for the verification conclusions, and are also further checked, as considered appropriate, through interviews with key personnel.

- /1/ Data for Humm Bond *DRAFT Pricing Term Sheet 2021-2*
- /2/ Humm – CBI Information Sheet
- /3/ Humm – Green Bond Framework for ABS Notes, 2021 (“Green Bond Framework”)
- /4/ Humm – Final Pool Cut, 31 May 2021
- /5/ Humm – Confirmation of allocation of proceeds, as at August 2021

Background documents related to the Green Bond.

- /5/ Climate Bond Standard version 3.0, December 2019.
- /6/ Climate Bonds Initiative *Solar Sector Criteria*

## 2.2 Interviews with and Information Collected from Bond issuer stakeholders

DNV GL primarily communicated with Humm’s Senior Securitisation Manager, Dennis Koh to gather information about the Bond and collected information from the issuer as follows:

The following key persons were involved in these communications.

- /8/ Bianca Spata, Group Treasurer, Humm
- /9/ Dennis Koh, Senior Securitisation Manager, Humm

## 2.3 Resolution of outstanding issues

The objective of this phase of the verification is to resolve any outstanding issues, which need be clarified prior to DNV GL’s conclusion on the Bond. In order to ensure transparency, a verification protocol was customised for the audit. The protocol shows in a transparent manner the criteria (requirements), means of verification and the results from verifying the identified criteria. The verification protocol serves the following purposes:

- It organises, details and clarifies the requirements a Green Bond is expected to meet;
- It ensures a transparent verification process where the verifier will document how a particular requirement has been verified and the result of the verification.

The verification protocol consists of two tables. The different columns in these tables are described in the figure below. The completed verification protocol for the Bond is enclosed in Appendix A and Appendix B to this report.

A corrective action request (CAR) is raised if one of the following occurs:

- (a) The Bond issuer lacks or has deficient processes and procedures that will influence the ability of the Bond issuer to meet the requirements of the Climate Bond Standard;
- (b) The Climate Bond Standard requirements have not been met.

A clarification request (CL) is raised if information is insufficient or not clear enough to determine whether the applicable Climate Bond Standard requirements have been met.

A forward action request (FAR) is raised during verification to highlight issues related to the Bond issuer’s implementation of the requirements of the Climate Bond Standard that require review during a subsequent verification.

Means of verification (MoV) are <b>document review (DR)</b> , <b>interview (I)</b> or any other follow-up actions (e.g., on site visit and telephone or email interviews) and <b>cross-checking (CC)</b> with available information relating to the Bond	The discussion on how the conclusion is arrived at and the conclusion on the compliance with the checklist question so far.	<b>OK</b> is used if the information and evidence provided is adequate to demonstrate compliance with Climate Bond Standard requirements. A <b>corrective action request (CAR)</b> is raised when the Bond issuer lacks or has deficient and procedures that will influence the ability of the Bond issuer to meet the requirements of the Climate Bond Standard or the Climate Bond Standard requirements have not been met. A <b>clarification request (CL)</b> is raised if information is insufficient or not clear enough to determine whether the applicable Climate Bond Standard requirements have been met. A <b>forward action request (FAR)</b> during verification is raised to highlight issues related to Bond implementation that require review during a subsequent verification.

### 3 VERIFICATION FINDINGS

This section summarises the findings from the verification of the Bond.

#### Pre Issuance Verification

*Based on the limited assurance procedures conducted, nothing has come to our attention that causes us to believe that the 2021-2 Humm Green ABS Bond, is not, in all material respects, in accordance with the Pre and Post Issuance requirements of the Climate Bond Standard Version 3.0 and Associated Solar Technical Criteria.*

## 4 VERIFICATION STATEMENT

DNV GL has performed the Pre and Post Issuance Verification of the 2021-2 Humm Green Bond. It is DNV GL's responsibility to provide an independent verification statement on the compliance of the Humm Green Bond with the Climate Bond Standard.

DNV GL conducted the verification in accordance with the Climate Bond Standard Version 3.0 and with International Standard on Assurance Engagements *3000 Assurance Engagements other than Audits or Reviews of Historical Information*. The verification included i) checking whether the provisions of the Climate Bond Standard were consistently and appropriately applied and ii) the collection of evidence supporting the verification.

DNV GL's verification approach draws on an understanding of the risks associated with conforming to the Climate Bond Standard and the controls in place to mitigate these. DNV GL planned and performed the verification by obtaining evidence and other information and explanations that DNV GL considers necessary to give reasonable assurance that the Humm Green Bond meets the requirements of the Climate Bond Standard.

Based on the limited assurance procedures conducted, nothing has come to our attention that causes us to believe that the Humm Green ABS Bond, is not, in all material respects, in accordance with the Pre and Post Issuance requirements of the Climate Bond Standard Version 3.0 and Associated Solar Technical Criteria.
